PROJECTS

AI Editorial Workflow Automation (OpenClaw) Feb 2026 - Present

- Created and refined an AI agent workflow for an existing editorial process using GPT and Claude models.
- Designed prompts, rules, exception handling, and review steps to categorize press releases, rewrite them to publication standards, and flag issues for review.
- Cut processing time from about 10-15 minutes per release to roughly 5 minutes or less, while keeping human review throughout the workflow.
